

Model No. 9A and 9B Electric Operated Anchor Windlass

Up to 40 pound Anchor

A small 12 volt Anchor windlass, built of the highest quality cast corrosion resistant aluminum alloy housing, or cast bronze housing. Stainless steel shaft and fittings available with either two rope gypsies or one rope gypsy and one chain wildcat. The chain wildcat is easily controlled by turning the bronze handwheel to engage or release. Brake arrangement allows independent use of the rope gypsy and chain wildcat. Complete unit mounts on deck and includes solenoid; water tight chrome plated foot switch and emergency handle. Deck pipe will handle chain and line with thimble.

Designed for use on boats 24' to 35.'
